## IISG UnwantedMeds Program

**Guest: Laura Kammin, Illinois-Indiana Sea Grant, University of Illinois at Urbana-Champaign**

Illinois-Indiana Sea Grant (IISG) combines research, education, and outreach to empower communities to secure a healthy environment and economy. One of our focus areas is stewardship of pharmaceuticals and personal care products (i.e., proper use, storage, and disposal). Laura Kammin, IISG's pollution prevention program specialist, will discuss how the IISG UnwantedMeds program has helped communities in Illinois, Indiana, and beyond set up sustainable medicine collection programs. She will also provide a short overview of other topics that IISG's addresses in order to facilitate more local partnerships.

Champaign County
