Urbana's Sustainable Water Management Plan

Guest: Scott Tess, Environmental Sustainability Manager, City of Urbana

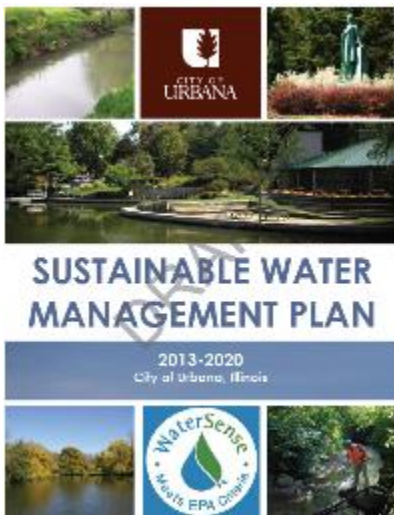

Natural Resource Building

615 E. Peabody, Room 101

Champaign, IL 61820

In 2013, the City of Urbana approved a Sustainable Water Management Plan that reviews the current state of five Aspects of water management and lays out goals to manage these aspects more sustainably by implementing specific, achievable actions. The five aspects are:

- Potable Water Supply and Demand

- Potable Water Quality
- Surface Water and Stormwater Quality
- Flood Management
- Recreational Waters

The scope of actions prescribed by the plan include:

- Conservation retrofits in City-owned facilities

- Regional collaboration
- Public policies
- Public engagement

Scott will discuss the existing conditions and the goals for each aspect of the plan and share some thoughts on plan making.

Free Lunch provided by [Pekara Bakery!](#)

Metered Parking available on Pennsylvania Avenue.
