## Prairie Fruits Farm

[4410 N. Lincoln Ave, Urbana, IL](#)

We have transformed our landscape into diversified perennial crops and livestock. Our farm embodies core principles of sustainability including environmental stewardship, economic viability and social responsibility. We strive to educate our community about organic and sustainable agriculture and the connections between food production and consumption. We also hope to serve as a model for others interested in small-scale diversified farming systems. Little by little, we are working toward building a vibrant local food system in Central Illinois.

\$8 fee for sustainability (includes tasting).
