Student Dining and Residential Programs

[301 E. Gregory Drive](#)

Champaign, IL

University Housing's 2010 Strategic Plan identified stewardship of resources as critical to our long-term success. According to the plan, stewardship of resources means "University Housing will demonstrate intentional and transparent stewardship of the financial, physical, and human resources of our entire organization. We will seek to use and conserve our resources in an effective manner that meets the needs of our residents and customers seeking and expecting excellent value."

While University Housing had already initiated a number of sustainability efforts, the University developed the Illinois Climate Action Plan (iCAP) in May 2010, identifying new sustainability mandates with which Housing will need to comply. Additionally, the Student Sustainability Committee (SSC) was asking for support on multiple initiatives.

As a result, University Housing identified the need to pool our sustainability resources through a single point of contact and formed the Housing Sustainability Council.

Notes: Lunch will cost about \$10. Street parking is available on Fourth or on Peabody, and the buses stop at SDRP.
